CCN is the bridge that promotes and contributes to the above effort through the CCN Europe China Business Center

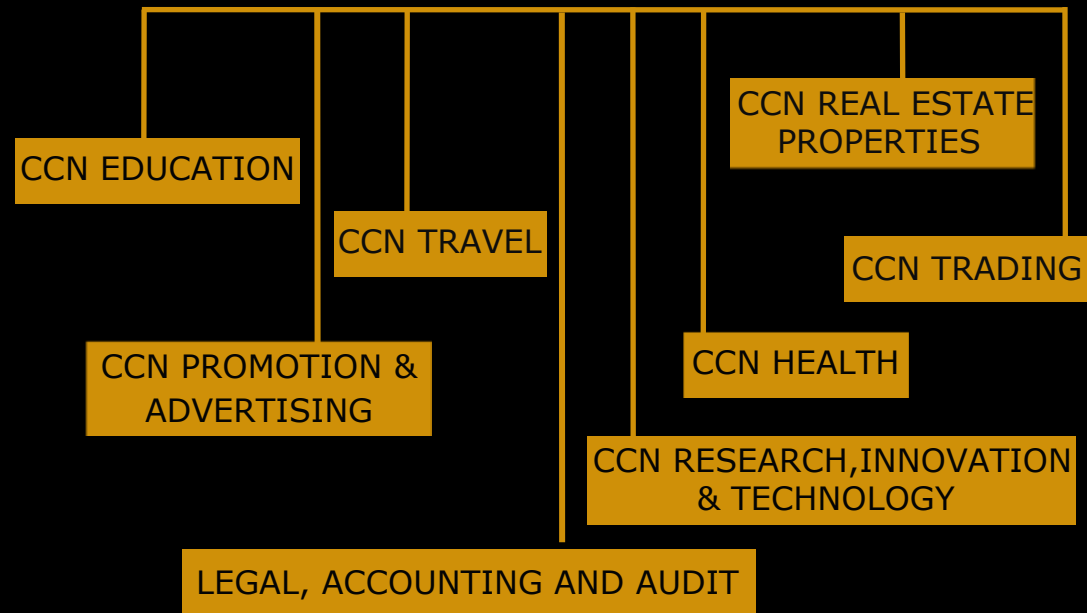

The purpose of this ambitious new initiative is multi-faceted: it aims to expand trade, productivity and tourism, and to improve the standard of living of the people. It also aims to advance culture and civilization.

In this respect, CCN is deeply appreciative of the support and deference that the Chinese People are providing to its activities, for fulfilling the common objectives of promoting friendship, culture and civilization between nations.

Within the framework of the Silk Road paradigm, CCN NETWORK is establishing CCN CENTER, which includes the following group of companies that aim to promote trade between China and its foreign partners:

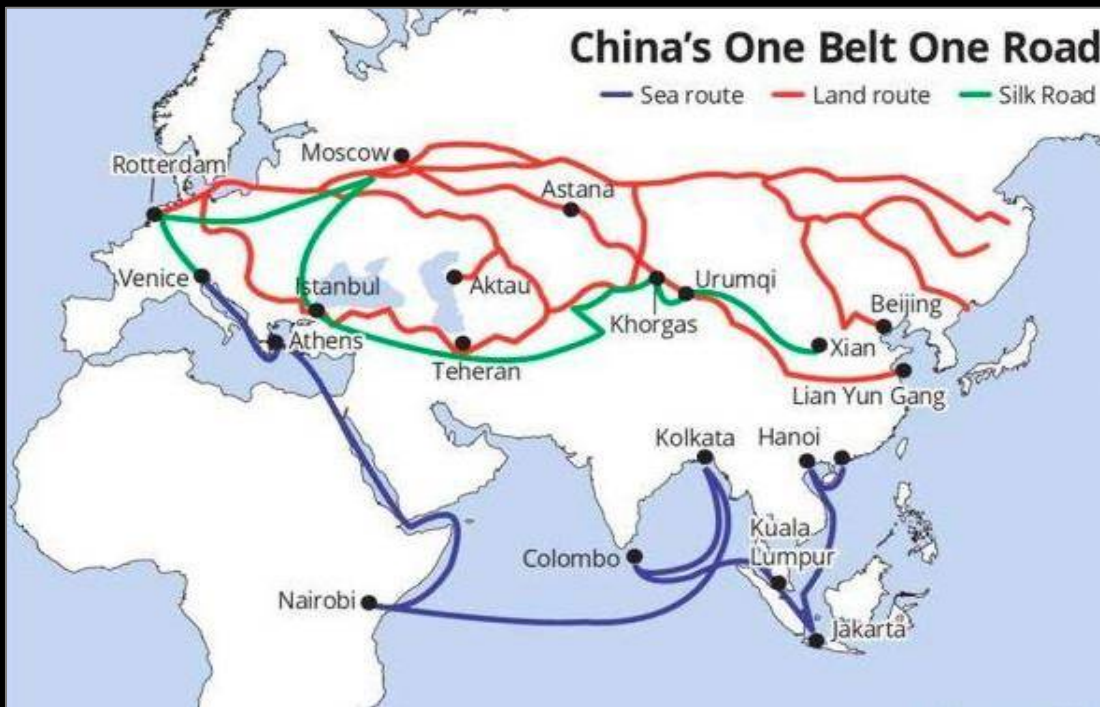

CCN CENTER

CCN NETWORK

China's One Belt One Road

— Sea route — Land route — Silk Road

CCN EUROPE CHINA BUSINESS CENTER

will provide the umbrella for CCN TRAVEL, CCN PROMOTION / ADVERTISING, CCN EDUCATION, CCN TRADING, CCN HEALTH, CCN REAL ESTATE PROPERTIES, CCN RESEARCH INNOVATION & TECHNOLOGY, LEGAL ACCOUNTING AND AUDIT

The CCN Europe China Center (CECBC) will provide supporting services for companies wishing to cooperate with China and Chinese enterprises that are intending to develop their international cooperation more easily and credibly by having an overseas representative office in an affordable and luxurious corporate setting within the EU and the Euro zone.

With the exodus of the United Kingdom from the EU, Cyprus is becoming an increasingly attractive and highly organized center of Europe, one of the most liberal and welcoming destinations for international cooperation.

The CECBC will be strategically located in the center of the nation's capital, very close to the headquarters of the banking and offshore industries of the island. The attractive location can provide multiple opportunities for enterprises. It is conveniently located within **only** half an hour from Larnaca International Airport.

The CECBC promises to be the important first step of your international expansion.

ONE STOP SHOP SERVICES:

1. SERVICES FOR CHINESE COMPANIES ABROAD:

- The CECBC offers its clients a full scale of company administration services including reception service, telephone services, photocopying, fax and internet services.
- There are conference rooms (small and large) for corporate meetings. CECBC will have secretarial services for its clients which will include typing, word processing, office organization and translation services, according to the client's needs.

2. SERVICES FOR EUROPEAN AND OTHER FIRMS IN CHINA:

CECBC also offers reciprocal services to those companies which wish to take advantage of the Chinese market but need help to set up their companies in China.

The Chinese market is conducive to providing quality control services, and to business activities such as importing and selling overseas products to Chinese consumers.

The CECBC provides a vehicle to companies in overcoming the problems of starting a **collaboration** in China by offering such facilities as strong Chinese language and cultural skills, knowledge of the operating procedures, and on-ground support with company deliberations.

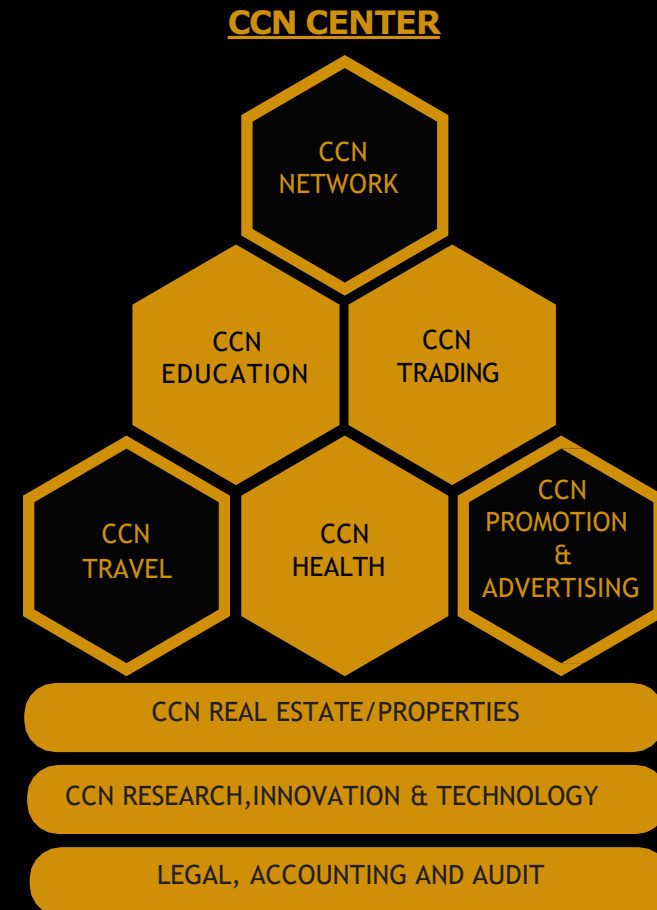

Moreover, CECBC will provide assistance in company establishment, tax compliance, accountancy and legal matters for trouble-free operations in the Chinese market.

The CECBC undertakes all the logistical and on-ground support services to effectively establish your company in that lucrative market.

3. MANUFACTURE/ASSEMBLE YOUR PRODUCTS IN THE EU AND TAKE ADVANTAGE OF LOWER IMPORT DUTIES AND TAXES:

For those Chinese firms which need to have a solid manufacturing/ assembly presence in the European Union, and take advantage of the EU tax regime, CECBC can help:

First and foremost, we are offering, with very low cost, manufacturing/assembly facilities to Chinese manufacturers **in which** to assemble their products within the European Union. **This** service, as well as the operational support as described herein, would be available to Chinese firms, so **that** they can seamlessly, and in full compliance, begin production of their goods within the EU, affording them a cheaper product price and more sales within the EU.

CCN RESEARCH, INNOVATION & TECHNOLOGY

CCN R&I technology is cooperating with hi-level academics, institutions and universities in Europe and China for the development of research and innovations for the increased well-being of citizens.

LEGAL ASSISTANCE

CCN EUROPE-CHINA BUSINESS CENTER offers the largest and most prominent law firm in Europe which is continually expanding its operations. It is focused on provision of high-level advice on complex business and finance projects in the light of its international profile and clientele.

ACCOUNTING AND AUDIT

All the major international accounting firms operate in Europe and offer a complete range of accountancy services with qualified and experienced accountancy personnel. All European companies, according to Cyprus Company and tax Laws, must keep proper accountancy books and records, file **annual** tax returns and prepare audited financial **statements**.

CCN TRAVEL:

CCN is promoting travel and tourism between the two nations and between China and Europe, in collaboration with a leading travel agency in China and Europe. Services will exist to provide specific information that is normally needed by tourists (such as sites, maps, restaurants, hotels logistics, as well as music, news, tv, culture, history).

CCN PROMOTION/ADVERTISING:

The CCN advertising and promotion office will be offering business services to Europe and European companies that would be interested to promote their products and services in China.

CCN will form a collaborative agreement with communication strategy agencies in Europe and China. The goal is to reach an agreement with one communication strategy agency in each European country. In this respect CCN will represent these companies.

CCN EDUCATION:

CCN has ambitious plans in the field of Education, **for example the** creation of an educational hub in Europe and China to allow for educational curricular and training courses in Europe, China and the US. Short courses would encompass training in professional fields, learning English (for Chinese) and Chinese (for Europeans), entering STEM programs, learning leadership skills, attending sports academies, and completing Bachelor's, Master's, and Ph.D. degrees in Europe. All these in cooperation with leading Prep Academies and Universities in Europe.

ONLINE EDUCATION

CCN is collaborating with Universities and other educational institutions to offer online courses in English as a Second Language and in Chinese (Simple) as a Second Language.

Short courses would encompass training in professional fields, learning English (for Chinese) and Chinese (for Europeans), entering STEM programs, learning leadership skills, attending sports academies, and completing Bachelor's, Master's, and Ph.D. degrees in Europe and the United States.

CCN REAL ESTATE/PROPERTIES:

One of our strongest subsidiaries is our real estate/properties company which includes a team of experts with many decades of expertise. CCN real estate/properties team deals with all matters related to immovable properties, ranging from advice and negotiations on the terms of acquisitions, sales, transfers or financing (and all the related matters) to disputes involving commercial and residential property. Property investments in Europe are a gateway for relocation, for permanent resident permits, in addition to being very lucrative investments.

We advise both individual and corporate clients on:

- Sale-purchase agreements
- Acquisition of property by non-residents and property management for non-residents
- Review, negotiation, drafting and conclusion of construction agreements and rental agreements
- Wills, probate and re-sealings and estate administration

CCN TRADING:

CCN's aim in this area is to create a virtual cooperation, mutually beneficial for both sides, through which rigorously selected Chinese companies would become members and gear their products to suit the EU markets.

CCN HEALTH

CCN will facilitate the development of the increasingly popular traditional Chinese medicinal practices in the EU through its investment in infrastructure (distribution systems, promotion, agreement with point of sale establishments) and its sourcing efforts, in order, on the one hand to offer a service to the public, and on the other hand, to avoid tarnishing the positive outlook that this health practice enjoys. In China there have been medicine companies for many years now that offer traditional Chinese medicine.

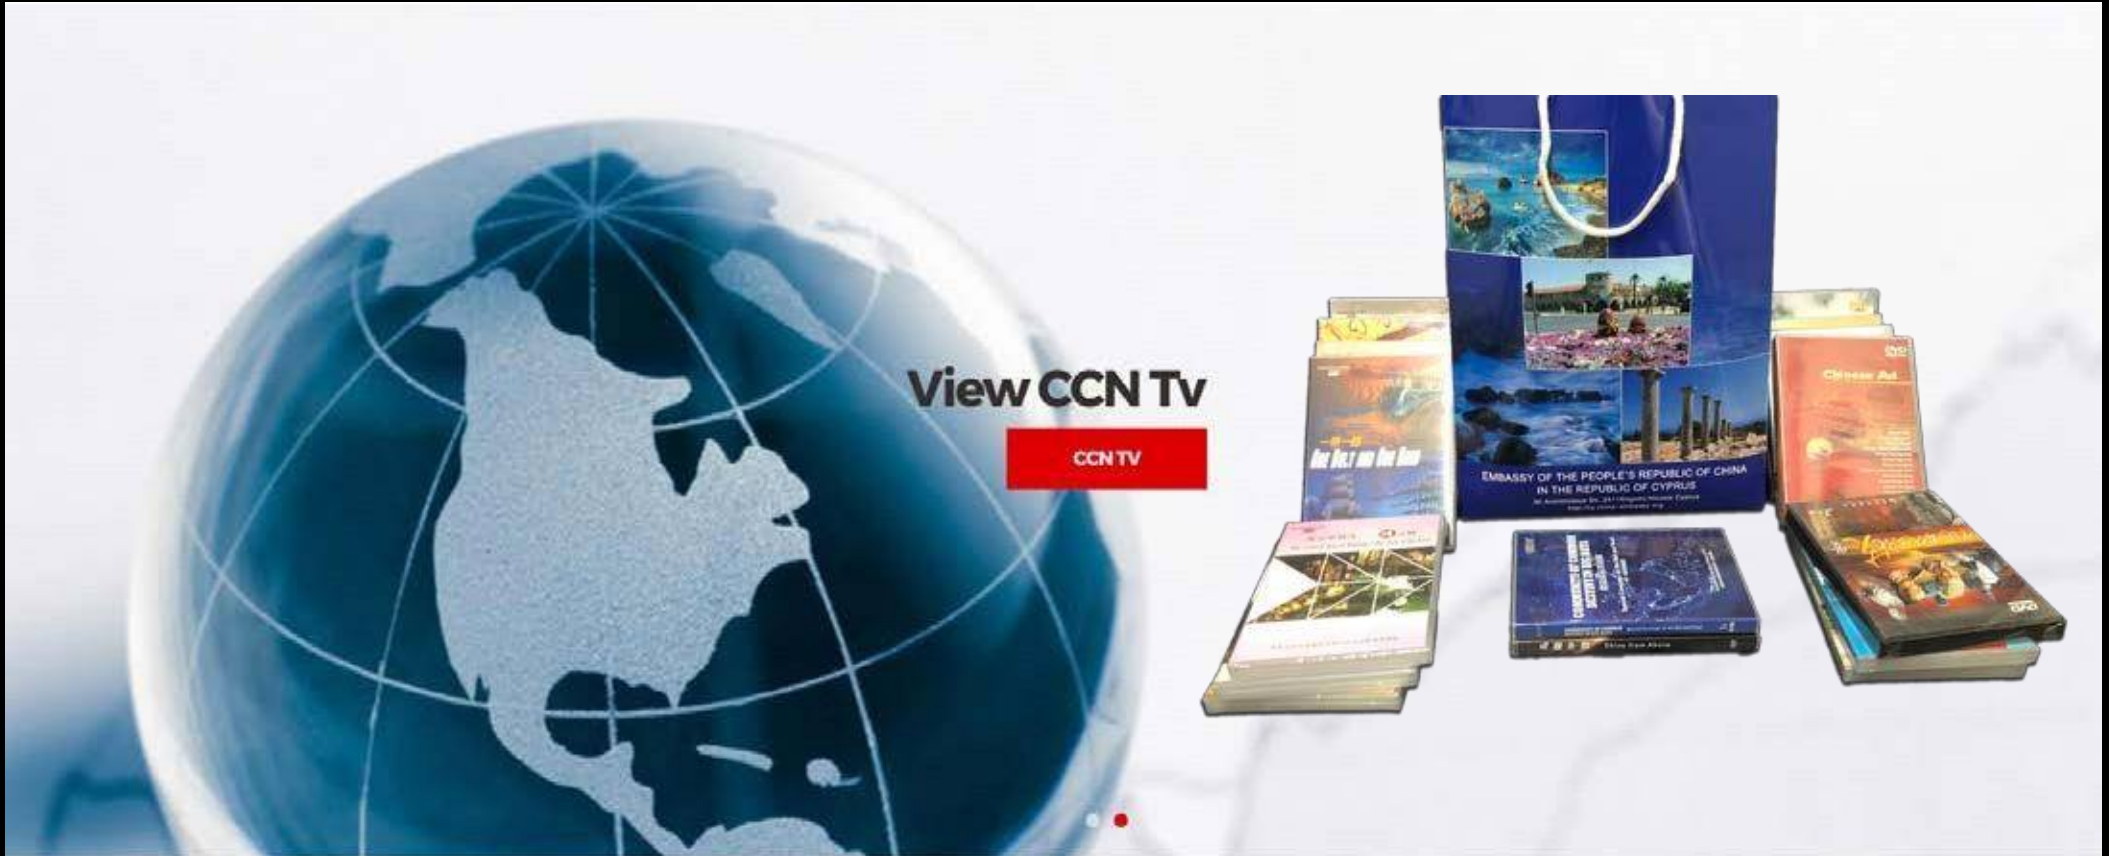

The CCN HEALTH office at the Business Center will help Chinese pharmaceutical companies to enter into the European market and European companies to cooperate with Chinese companies that produce traditional Chinese medicinal substances, including organic and herbal products. This medicine does not need a permit from the authorities to be placed on the market. markets.

CCN AND THE SILK ROAD:

CCN, in collaboration with various forums within the People's Republic of China, is actively promoting the revival of the Silk Road, and the idea of "one road, one zone." The purpose of this ambitious new initiative is multi-faceted. It aims to expand trade, productivity and tourism, and to improve the standard of living of the people. It also aims to promote friendship and to advance culture and civilization between China and the EU.

Given the level of investment that CCN has undertaken, and will continue to undertake, in technology, infrastructure, human capital, and immovable assets, we estimate that CCN will provide significant returns to its investors and help promote cultural, political, economic and social ties between China and Europe.
